Rev It Up!

Community & Sportsmanship

Dream Team Challenge

Here at Right Club, we are a team. What better way to start the year off than this collection of exciting team challenges! We'll challenge our minds and bodies with group games that show everything is more fun with friends!

Motion Commotion

Get ready to put the "loco" in locomotion! This kinetic collection of animated activities will help us explore all things motion, from movement-inspired artwork to goofy games and the science that makes it all possible.

Right Club Gives Back

Sometimes people in our community need help, but what can kids do? A lot! We'll find out just how much by creating our own service projects to make our school, town, and world a better place as we give back to our neighbors.

Mega Makers

Engineering & Self-Expression

Brick Masters

Let's put on our hard hats. It's time to hit the construction site! We'll put our engineering expertise to the test to see how you "stack" up against friends. Get ready to build silly structures and ingenious inventions brick-by-brick.

DIY Doozies

Calling all makers and creators! This collection of challenging and fun activities will stretch our resourcefulness to the limit, while showing us some new tricks of the DIY trade. Wait until you see what we are capable of creating with a little imagination and a can-do spirit!

Artsy Fartsy

Art is a way of expressing our ideas in creative, beautiful, and sometimes strange ways. We'll journey through this world to find out how artists create their masterpieces while discovering our own talent and style.

Winter

Epic Innovators

Creativity & Problem-Solving

You've Got Game

From lesser-known games from other parts of the world to new spins on some classic sports, this unit shows us there are lots of ways play! We'll even invent some one-of-a-kind games of our own that are sure to be new favorites!

Puzzlemania

Ready for some perplexing puzzles and ridiculous riddles? This collection of activities will be brain-busting fun! We'll create our own clever conundrums to test our friends and use what we've learned in a special Escape Room challenge!

Homemade Arcade

Everyone loves arcade and carnival games. To find out how they became a reality, we'll take a closer look at some of these classic contraptions and even invent our own unique creations, culminating in a one-of-a-kind Homemade Arcade!

SPRING

Stage Quest

Literature & Performing Arts

Step Into the Story

From lesser-known games from other parts of the world to new spins on some classic sports, this unit shows us there are lots of ways play! We'll even invent some one-of-a-kind games of our own that are sure to be new favorites!

Move 'n Groove

Lace up those dancin' shoes and show us what you got! We'll hit the dance floor in this fun-filled exploration of movement and music. From music from faraway lands to dance steps inspired by everyday life, we learn there is no wrong way to get down!

RC Variety Show

Students will prepare for Right Club's annual Variety Show! They will experience all of the elements of putting on a polished performance, like rehearsing, marketing, becoming an emcee, and taking to the stage for a memorable night with family and friends.

Amazing Journeys

Culture & Exploration

Astro Explorers

People like Galileo, Sagan, and Ride dedicated their lives to teach us about the stars, but there are still incredible discoveries waiting to be made. We'll blast off to uncover the history of this journey for knowledge and look to the future to see what lies ahead.

Time Traveler

History is much more than words in books; it's the story of how we got here. Let's jump into our time machine to explore some of the most fascinating and unusual people, places, and events that led us to today, through crafty art projects and fun outdoor games

Around the World in 10 Days

Our planet is an incredible place filled with beautiful locations and diverse cultures. What do kids in Asia do for fun? What's life like in Africa? What unique adventures are found in South America? Let's explore it together on a 10 day whirlwind trip around the globe.

Weird & Wonderful

Science & Investigation

Myth Busters

Movies, TV, and the internet often show us things that don't seem possible. How do we separate fact from fiction? A little bit of science and innovative thinking will help! We'll test out various myths, mysteries, and misconceptions in our quest for the truth.

Animal Oddities

The animal kingdom includes more than bunnies and kittens. It's time to show the bobbit worm and ninja lanternshark a little love, too! We'll take a look at some of these underappreciated creatures, their amazing abilities, and the curious things they do to survive.

Comic Con

Comic conventions are celebrations of creativity and pop culture. We'll step into the shoes of creators and fans, while looking back at the history of the genre and the science behind the stories. This collection of heroic activities will be super-powered fun!

Grand Finale

Leadership & Self-Reflection

Kids Take Charge & Right Club Memories

Ever wonder what it would be like if kids ran the world? We'll find out in this role-reversing unit that sees kids sharing their skills and knowledge with their friends, and even teach the adults! Then, we'll wrap up the year by reflecting on all the Right Club memories we created together!
